**SAKATA®**

President Hiroshi Sakata

# INTRODUCTION

Sakata has more than 100 years of experience in providing growers with innovative and value-added genetics. While our early reputation was built around world-class seed production, the quality of our vegetative assortment is second to none and continues to expand.

Our breeding efforts are focused on delivering exceptional performance throughout the value chain; meeting the demands of growers, retailers and end consumers alike. In addition to delivering reliable and award-winning performance, we provide in-depth technical support for all our vegetative products, together with marketing programmes to help you sell.

Our dedication toward advancing the flower industry is reflected in our dynamic breeding programmes and an impressive pipeline of innovative products to come. Breeding breakthroughs don't come around often, but Sakata's vegetative assortment is a great place to start your search for innovative and award winning genetics.

New and exciting this year is Cape Daisy® Double ... Ladies Love Daisies ... and double the daisy is double the fun! Sakata's extensive Cape Daisy assortment now also offers two really eye-catching double flowered varieties which not only have masses of bright, beautiful flowers for retail appeal but an excellent plant habit for great garden performance as well! Cape Daisy® Double Delight and Purple are true eyecatchers! We are also thrilled to introduce two new varieties to our 'natural beauties', Calibrachoa Calipetite®. These eagerly-awaited additions to the series will please all who are looking for compactness without chemicals.

SunPatiens® grows in sun or shade, rain or shine, and provides unmatched colour in the garden for three seasons of the year. Easy to grow and unaffected by downy mildew, more and more growers are converting to SunPatiens® and watching their sales grow as a result. Find out more on page 12 about SunPatiens® the Landscaper's secret to success and how SunPatiens® is giving back to Nature!

Natural beauties!

CALIBRACHOA X HYBRIDA  
**CALIPETITE®**

*Blue*

*Pink Vein*

*Red*

*Rose*

*White*

*Yellow Imp*

*Yellow Tiger*

Calipetite® is a breakthrough in Calibrachoa breeding. It is a naturally compact mound of colour that grows into a dense ball without any need for growth regulators or supplemental lighting. This eye-catching series is ideal for colour bowls, and has irresistible retail sales appeal.

- High pH tolerance (7.2+) prevents yellowing of foliage
- Dense mounding habit is ideal for shipping and strong retail presentation
- Naturally compact without PGRs, economical and environmentally friendly
- Blooms under very short days

**NEW!**

**YELLOW IMP: IMPROVEMENT OVER CURRENT CALIPETITE YELLOW**

- Stronger plant: better rooting and less botrytis sensitive
- Bright Yellow flowers
- Better in line with the series in habit and production time
- Good coverage of flowers with nice flower presentation

**NEW!**

**YELLOW TIGER: NEW SPECIAL COLOUR YELLOW WITH ORANGE VEIN**

- In line with the series in habit and production time
- Good coverage of flowers with nice flower presentation
- Flower colour can change through the season: more intense under higher light conditions.

*Soft Pink*

A consumer favourite! Dianthus BonDia is available in 4 lovely colours and is the ideal pot plant for growers and retail. Dianthus BonDia is extremely uniform. All varieties have the same plant habit and flower shape, which make them easy to grow and ideal to mix. Sweet flowers and excellent branching – Dianthus BonDia is the perfect choice for an attractive patio display on balcony and terrace.

- Uniform series in plant habit and flower shape and earliness
- Semi-double flowering
- Fragrant flowers
- Well-branching plant
- Suitable for popular trio mixes
- Tip! Excellent gift item for Mother's Day

# SUNPATIENS®

The all-weather Impatiens

SunPatiens® genetics are developed in joint cooperation with Indonesia (IAARD)

SCIENCE INNOVATION NETWORK

These remarkable plants represent a breeding breakthrough: robust, sun-loving Impatiens that thrive in full sun or part shade and deliver continuous colour from spring, all through summer and right up to the first harsh frosts of winter. Unaffected by Downey Mildew, SunPatiens® are an excellent alternative to seed Impatiens, offering non-stop colour and robust coverage in semi-shaded areas.

# SUNPATIENS® VIGOROUS

*Clear White*

*Lavender*

*Lavender Bicolour*

*Orange Imp*

*Pink Pearl*

*Red*

*Rose Pink*

*Scarlet*

SunPatiens® Vigorous is the SunPatiens® series most used for landscape and mass plantings. The new generation of SunPatiens® Vigorous is strong, well branched and with well-controlled vigour, even in warmer climates. SunPatiens® Vigorous are recommended for use in (mass) beds and large containers, and are ideal for economical, long-lasting ground cover.

The three new introductions in the SunPatiens Vigorous series for 2019/20 all have the characteristic improvements:

- Improvement on plant habit. Better in line with the new generation of Vigorous varieties
- Good coverage of the flowers above the foliage

## SUNPATIENS VIGOROUS LAVENDER BICOLOUR

- First bicolor in the series with attractive Lavender flower pattern

## SUNPATIENS VIGOROUS ORANGE IMP.

- Better flower colour than Vigorous Orange

## SUNPATIENS VIGOROUS SCARLET

- Improved colour, replaces Vigorous Scarlet Red

60-85 cm

Cuttings

Full sun - half shade

Fairly Mounding

60-100zz cm

Patio, Bedding,  
Mix containers,  
Hanging baskets

14-18 cm

## GROW SUNPATIENS® COLD WITH GREAT RESULTS

SunPatiens®, very well known for its excellent heat tolerance, also tolerates cold temperatures!

Moreover, it tolerates colder temperatures than most regular Impatiens New Guinea. Therefore SunPatiens® offers great advantages for both consumers and growers. For consumers, the better cold tolerance offers great advantage for a broader use of SunPatiens® as a true bedding plant in colder climates, as well as in Autumn. For growers, the better cold tolerance offers the advantage of saving heating costs when growing plants. In addition, the colder conditions keep the plants more compact, resulting in better plant habit and less need to use PGR, which give better plants for transplanting outdoors and better garden performance. The LfULG (Sächsisches Landesamt für Umwelt, Landwirtschaft und Geologie) in Dresden conducted research on a wide range of Impatiens New Guinea,

including SunPatiens®. Plants were grown under two different growing conditions, one with an average day temperature of 14°C and the other at an average temperature of 19°C. All SunPatiens® varieties in the test scored higher in overall impression at 14°C compared with plants grown at 19°C.

### **RECOMMENDATIONS FOR GROWING SUNPATIENS® COLDER:**

Keep temperature at 16 - 18°C in the first week (approximately) after transplanting. This will allow the roots to get a good start in the pot. After plants are established, temperature can be lowered to an average day temperature of 14 - 15°C. SunPatiens® are rather flexible and can accept temperatures lower than 14°C as long as the average temperature is kept at 14°C. Temperatures below 12°C are not recommended for a long period of time. When grown colder, SunPatiens® flowering delays with 2 to 3 weeks, depending on how cold they are grown.

# SUNPATIENS® IS THE LANDSCAPER'S SECRET TO SUCCESS!

The truly unique genetic background of SunPatiens® delivers unsurpassed garden performance like no other flowering annual. What makes them so special?

- Strong roots that take hold quickly and are resistant to soil pests
- Plants that thrive under high heat, rain and humidity
- Full-sun to shade versatility
- Continuous, non-stop blooming from Spring through Autumn
- Carefree, low-maintenance plants (low fertiliser requirements, self-cleaning, less weeds)
- Strong insect and disease resistance (not impacted by Downy Mildew, no snails)

*NOTE: Download the complete Landscaper's Guide at [www.sunpatiens.eu](http://www.sunpatiens.eu)*

# SUNPATIENS® GIVES BACK TO NATURE

## ARTIS Amsterdam Royal Zoo

SunPatiens® has been giving back to nature since the early 2000s, when Sakata Seed Corporation, the breeder of SunPatiens®, reached an agreement with the Indonesian Government (IAARD) in relation to the botanical species of Impatiens from which SunPatiens® is partly derived. The agreement that was reached between Sakata and Indonesia was a forerunner of the current Nagoya Protocol. This protocol determines rights and obligations for the countries that signed it. This means that for every SunPatiens® plant that is sold, a contribution is made to Indonesia for local research into the maintenance of the biodiversity in that country. When you buy SunPatiens®, you give back to nature.

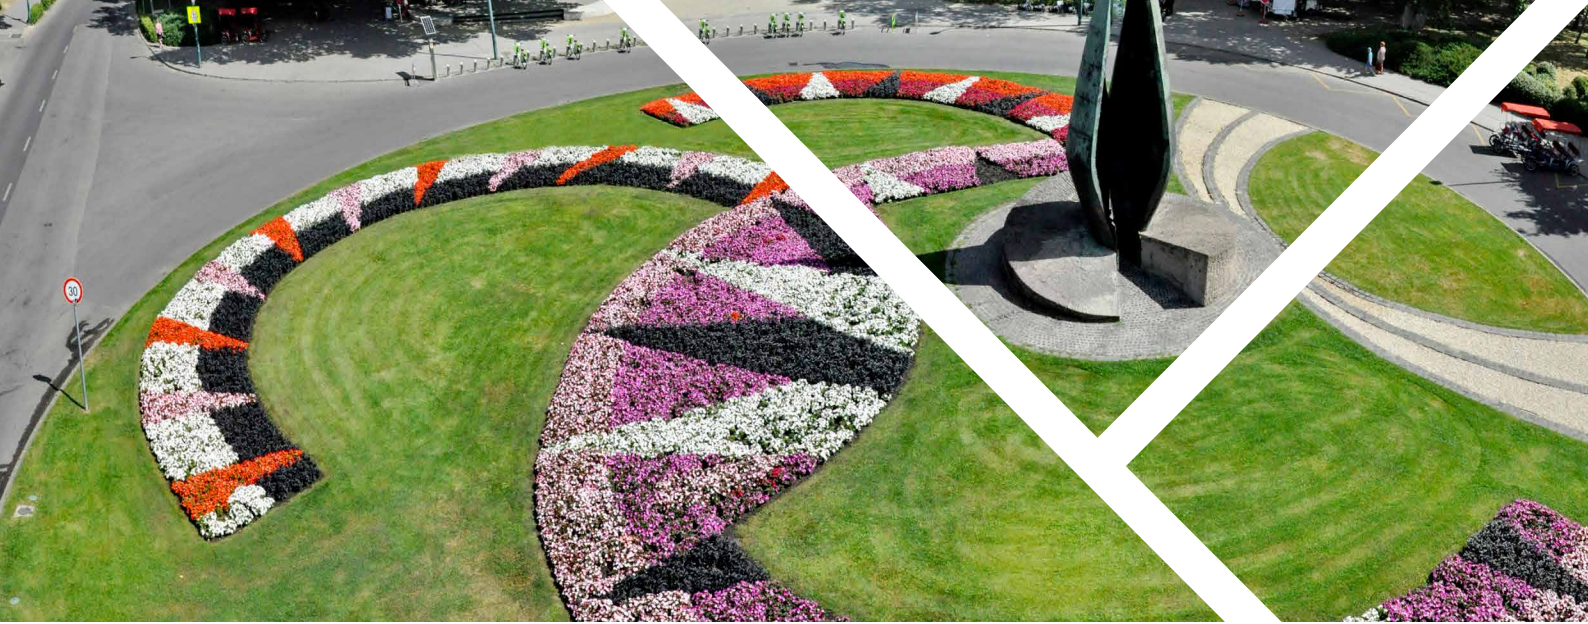

### Air Purifying

An outstanding side-effect is that SunPatiens® is beneficial for its immediate surroundings. Independent research has proved that SunPatiens® absorbs nitrogen dioxide 3 to 4 times better than the average plant. Planting SunPatiens® can therefore contribute to air purification. In countries with a warm climate, it has even been demonstrated that SunPatiens® can contribute to air cooling.

Since January 2018, Sakata, breeder of SunPatiens®, proudly adopts the anoa and the Minangkabause House in ARTIS, Amsterdam Royal Zoo. The anoa and the Minangkabause House both originate from Indonesia, as does SunPatiens®.

MECARDONIA

# MAGIC CARPET™

Yellow

A tough, durable plant that is loaded with a continuous supply of bright yellow flowers all season long. Magic Carpet™ features a semi-mounding habit that is eye-catching at retail. Because it is both frost and heat tolerant, it is an ideal season extender for early and late sales.

- Extremely early to bloom
- Bright yellow blooms blanket plants all season long
- Durable along garden paths, in high traffic areas and between pavers
- Superb in baskets and as a component plant in mixed containers
- Versatile in production - can be produced in any size from 6 cm pack up to hanging baskets

OSTEOSPERMUM X HYBRIDA  
**CAPE DAISY® DOUBLE**

Double the Daisy is double the fun! New in Sakata's Osteospermum assortment are two really eye-catching double flowered varieties which not only have masses of bright, beautiful flowers for retail appeal but an excellent plant habit to please the grower as well.

- First Double Flowering varieties from Sakata
- Striking retail appeal!
- Strong branching plant keeps flower open under low light conditions
- Fast production time
- Free flowering variety

OSTEOSPERMUM X HYBRIDA  
**CAPE DAISY® ZANZIBAR®**

Zanzibar varieties are characterised by earliness, outstanding uniformity and a compact, well-branching habit. It is therefore the ideal series for production in packs and small pots. The tidy, uniform habit makes Cape Daisy® Zanzibar® attractive for growers and retailers.

- Flowers stay open under low light conditions
- For pot and patio
- Very easy to grow
- Very even flowering
- Compact habit
- Good heat tolerance

# x PETCHOA

Let it Rain or Shine!

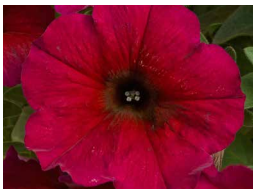

x Petchoa is breakthrough interspecific breeding combining the best traits of Petunia and Calibrachoa. BeautiCal® is an eye-catching attraction for retailers and consumers, whilst SuperCal is ideal for landscapers and mass plantings.

X PETCHOA HYBRIDA  
**BEAUTICAL®**

**BeutiCal**  
 Beats all!

Bordeaux

Caramel Yellow

Cinnamon

French Vanilla

Sunray Pink

The new generation for the pot and patio! Petchoa 'BeutiCal®' has a mounded plant habit with large flowers, and is incredibly weather tolerant with exceptional rain resistance. Popular for its unique colours and abundant flowering, BeutiCal® is an ideal combination of Petunia and Calibrachoa traits. Grower, retail and consumer friendly, it produces a mass of colour all summer long.

- Intergeneric hybrid with compact-medium mounding habit
- Very good weather and rain tolerance
- Large showy flowers till end of the Summer
- Mildew resistance: long lasting plant till end of the Summer
- Suitable for cultivation in 10.5-12 cm pots and mix containers
- Highly suitable for patio, terrace, balcony and garden beds

**FIVE BEAUTIFUL COLOURS**

- Bordeaux striking red colour *note: this colour can turn purple under sudden temperature drops, not recommended to cultivate below 10°C*
- Caramel Yellow, rich colour with red-brown vein
- Cinnamon, spicy orange colour
- French Vanilla, sweet light yellow with vein
- Sunray Pink, attractive pink vein with sunny yellow heart

# SUPERCAL® CHOICE SELECTION

*Blue*

*Blushing Pink*

*Cherry*

*Crimson Red*

*Pink*

SuperCal®, is the ideal solution for the landscape. Low maintenance across 3 seasons – the nonsticky foliage means that older flowers drop easily from the plants, with a new cover already in place. After the rain, SuperCal® stays fresh and full of colour. Mildew resistance: low mounding, spreading SuperCal® plants fill in really fast in beds. Unlike standard Petunia, it really holds up in all kinds of weather, constantly producing masses of medium sized flowers.

SuperCal® Choice selection colours are the go-to varieties for growers and landscapers who want to programme production and plant to schedule.
