Chères clientes, chers clients,

Nous sommes très heureux de vous présenter notre tout nouveau catalogue « Perennials & Chrysanthemums » Selecta one qui regroupe pour la première fois toutes les gammes d'automne.

Les Chrysanthèmes y prennent bien sûr une place essentielle puisque cette gamme représente l'un des axes importants de recherche et de croissance pour tout le Groupe Selecta One. Vous verrez que les nouveautés présentées s'inscrivent dans la continuité de la stratégie amorcée ces dernières années à savoir de proposer sur chaque segment de marché des lignées complètes en couleur et homogènes en végétation et floraison.

Nous vous invitons également à porter une attention particulière au concept « Autumn Friends » qui propose une gamme de combinaison de plantes à cultiver directement en composition. Ce segment prend une place de plus en plus importante dans les offres estivales et pré-automnales. La facilité de culture et la tenue en rayon chez les distributeurs sont indéniablement les deux atouts de cette gamme.

A côté de notre gamme de vivace et feuillage, vous trouverez également notre assortiment particulièrement attractif de lavande et plantes aromatiques. Le marché sur ces deux segments est très dynamique et nous veillons à ce que l'offre de Selecta one soit toujours la plus pertinente face à vos attentes. Nous vous souhaitons une très belle saison d'automne.

L'équipe Selecta one

Gentile cliente,

Siamo lieti di presentare il nostro ultimo catalogo Selecta one „Perennials & Chrysanthemums“, in cui per la prima volta sono riuniti tutti gli assortimenti autunnali. In questo contesto i crisantemi svolgono naturalmente un ruolo centrale, poiché questo assortimento rappresenta un importante caposaldo della ricerca e della crescita per l'intero gruppo Selecta one. Potrai constatare che con i nuovi prodotti a catalogo abbiamo confermato la strategia degli ultimi anni di offrire linee di colore complete in ogni segmento di mercato con caratteristiche di crescita e fioritura uniformi.

Vorremmo anche richiamare la tua attenzione sulla linea „Autumn Friends“. Qui hai a disposizione un assortimento nel quale sono abbinate piante che possono essere coltivate direttamente insieme. Questo segmento sta diventando sempre più importante nella gamma per l'estate e per il primo autunno. I due punti di forza di questo assortimento sono senza dubbio la facilità di coltivazione e il prolungato periodo durante il quale le piante possono essere immagazzinate presso il rivenditore.

Oltre al nostro assortimento di perenni e di piante ornamentali a foglia, troverai anche la nostra gamma particolarmente attraente di lavande e aromatiche. Il mercato per questi due segmenti è estremamente dinamico e cerchiamo di adattare sempre in modo ottimale la gamma di prodotti Selecta one alle esigenze dei nostri clienti. Ti auguriamo un'ottima stagione autunnale.

Il tuo team Selecta one

Dear customers,

We are delighted to present our latest Selecta one catalogue, entitled Perennials & Chrysanthemums. This issue encompasses all autumn ranges for the first time. It goes without saying that chrysanthemums take on a leading role, as this range is one of the cornerstones of research and growth for the entire Selecta one group. As you will see, with the new varieties that we are presenting, we have maintained our strategy from previous years of offering complete colour lines that share consistent growth and blooming periods.

We would also like to tell you about our Autumn Friends line-up. This is a range combining plants that can be cultivated directly alongside each other. This segment is becoming increasingly important for summer and early autumn. The twin strengths of this range are undoubtedly its ease of cultivation and storability for dealers.

In addition to our collection of perennials and leafy plants, you can also find our extraspecial range of lavender and fragrant plants. The market for these two segments is very variable and we always do our best to make sure that the Selecta one range is tailored perfectly to your needs.

We wish you a wonderful autumn season!

Your Selecta one team

Estimados Clientes,

Nos complace poder presentarle el más reciente catálogo de Selecta one „Perennials & Chrysanthemums“ [Perennes y Crisantemos] el cual por primera vez reúne todos los surtidos de otoño.

Naturalmente, a los crisantemos les corresponde un papel central, ya que este surtido representa uno de los ejes de investigación y crecimiento más importantes de todo el grupo de Selecta one. Podrá comprobar que con las novedades presentadas hemos mantenido la estrategia de los últimos años de ofrecer en cada segmento del mercado unas líneas de colores completas con períodos de vegetación y floración uniformes.

También nos gustaría llamar su atención sobre el concepto de „Autumn Friends“ [amigos de otoño]. Éste le pone a su disposición un surtido que combina plantas que pueden cultivarse directamente juntas. Este segmento está adquiriendo cada vez más importancia entre las ofertas para el verano y principio del otoño. Los dos fuertes de este surtido son, sin duda, su fácil cultivación y sus buenas propiedades para el almacenamiento por parte del vendedor.

Aparte de nuestro surtido de perennes y plantas de hoja le brindamos aquí también una oferta especialmente atractiva de lavanda y plantas aromáticas. El mercado de estos dos segmentos se muestra muy dinámico y dedicamos todos nuestros esfuerzos a adaptar el abanico de la oferta de Selecta one siempre de forma óptima a sus necesidades.

Le deseamos una magnífica temporada de otoño.

Su equipo Selecta one

F Le groupe Selecta ne propose pas uniquement une gamme vaste et variée de plantes ornementales de grande qualité, mais vous invite également à retrouver les qualités Selecta éprouvées dans différents types de produits. En fonction des modes de culture, vous pouvez disposer d'une large gamme de produits : boutures non racinées et racinées en différentes présentations et diverses configurations de plateaux, ainsi que les MiniRooter® prévus pour un démarrage de croissance rapide après empotage.

Pour nos clients disposant de l'équipement technique correspondant, nous avons complété notre gamme avec les bandes Autostix Media Strips by Visser permettant un traitement entièrement automatisé, ainsi qu'avec la solution ultime Selecta, ROCS®, composée de plants racinés dans un substrat, enrichi en ressources énergétiques. Avec cette offre, Selecta compte être en mesure de proposer une solution correspondant aux besoins de chacun de ses clients.

N'hésitez pas à contacter un représentant de Selecta et à profiter de ses conseils. Vous trouverez ensemble le type de produit correspondant au mieux à vos cultures.

IT Il Gruppo Selecta non solo offre una vasta e completa gamma di piante ornamentali, ma mette a disposizione la sua comprovata qualità anche in vari tipologie di formati. È infatti disponibile un'intera varietà di tipologie adatte alle diverse condizioni di coltivazione: sia che si tratti di talee non radicate o radicate in varie forme e diverse configurazioni di vassoio, oltre al MiniRooter® per una crescita rapida dopo il trapianto in vaso. Per i clienti che dispongono delle attrezzature tecniche adeguate, completiamo la nostra gamma con le Autostix Media Strips by Visser, che consentono il trapianto completamente automatico, e con il nostro prodotto di punta ROCS®, la soluzione Selecta che comprende talee radicate nel substrato con già inclusi i nutrienti necessari. Con questa gamma di prodotti, Selecta si dimostra all'altezza di offrire ad ogni cliente il prodotto a lui più adatto.

Potete contattare il vostro rappresentante Selecta per ulteriori consigli su come trovare la tipologia di prodotto giusto per le vostre esigenze di coltivazione.

GB The Selecta Group not only offers a wide and varied range of high-quality ornamental plants, but the proven qualities of Selecta plants are also available in various product types. There is a whole range of types available for different growing conditions, whether you're looking for unrooted or rooted cuttings in various forms and in different tray configurations, and there is even the MiniRooter® for quick-start growth after potting.

For customers with the appropriate technical equipment, we round off our range with Autostix Media Strips by Visser, which allow for fully automatic transplanting, and our top product ROCS®, the Selecta solution involving cuttings rooted in substrate with the required nutrients. With this product range, Selecta lives up to its claim of offering every customer the product that is right for them.

Talk to your Selecta representative for more advice on finding the right product type for your growing conditions.

ES El grupo de Selecta ofrece no solamente un surtido amplio y variado de plantas ornamentales de primera calidad a nivel general, sino que estas probadas calidades de Selecta se presentan también en diferentes tipos de productos. Según el cultivo, existe todo un abanico de tipos: desde el esqueje sin raíz o enraizado en diferentes variantes y en diversas configuraciones de bandeja hasta el MiniRooter® para el crecimiento rápido después de su plantación en la maceta.

Para los clientes que disponen del equipamiento técnico adecuado redondeamos el programa con Autostix Media Strips by Visser procesables de forma plenamente automatizada y con el producto excepcional ROCS®, la solución de Selecta con esquejes enraizados en sustrato y cargados de energía. Con esta oferta Selecta satisface su propia exigencia de poder brindar a todo cliente la oferta adecuada para él.

Diríjase a su representante de Selecta y pida su asesoramiento. Juntos van a encontrar el tipo de productos apropiado para sus cultivos.

Multiflora

F La ricchezza della gamma di Multiflora Selecta permette di proporre un assortimento di Chrysanthèmes fleuris de mi-septembre à fin octobre.

L'accent est mis sur les lignées qui permettent pour chaque segment de marché une offre complète en couleur et homogène en culture dans un souci de facilité et d'efficacité.

Notre large gamme trixi vous offre encore plus de confort et de créativité dans vos assortiments.

En complément, notre collection générale présente un des plus larges choix de couleur et de forme de fleur du marché pour vous permettre de différencier votre offre.

IT L'ampio assortimento Multiflora di Selecta consente di offrire una selezione di crisantemi con fioritura da metà settembre fino alla fine di ottobre.

Il focus è sulle linee di prodotto con le quali è possibile comporre un'offerta in ogni segmento di mercato che copra tutti i colori e renda possibile una coltivazione omogenea. In questo contesto prestiamo particolare attenzione alla semplicità e all'efficienza.

La nostra ampia gamma Trixi offre ancora più spazio all'economicità e creatività nel tuo assortimento di prodotti.

Inoltre il nostro assortimento offre una selezione di colori e forme dei fiori che non ha uguali sul mercato, dandoti la possibilità di distinguerti con i tuoi prodotti.

GB With the sumptuous Multiflora range from Selecta, you can offer a selection of flowering chrysanthemums from mid-September to the end of October.

It centres on product lines that allow you to put together products in any market segment that cover every colour and can be cultivated together. It is particularly worth noting their simplicity and efficiency.

Our extensive Trixi collection offers you even greater scope for convenience and creativity in your product range.

Our line-up also includes a selection of flower colours and shapes without equal on the market, which gives you an opportunity to make your products stand out from the crowd.

ES La amplia gama de crisantemos Multiflora de Selecta le da la posibilidad de ofrecer desde mitades septiembre hasta finales de octubre un surtido de crisantemos floridos.

Lo esencial son unas líneas de productos con las cuales en cada segmento del mercado puede Vd. combinar una oferta que abarca todos los colores y permite una cultivación uniforme. Dedicamos especial atención a la sencillez y eficacia de esta oferta.

Nuestro abundante surtido de Trixi le brinda aún más confort y creatividad para su oferta de productos.

Además, nuestro abanico de productos incluye una selección de colores y formas de flor sin igual en el mercado, dándole así a Vd. la posibilidad de resaltar con su oferta.

F Cette gamme de variétés unifleurs Selecta est unique sur le marché. Les formes et tailles de fleurs permettent une offre différente, originale qui complète parfaitement la gamme Orchestra®. Elles décoreront magnifiquement terrasses, balcon et patios tout au long de l'automne et vous permettront également de vous adresser à une nouvelle clientèle.

GB This single-flower range from Selecta is unique on the market. The shapes and sizes of the flowers provide room for extraordinary and beautiful products that make the perfect complement to the Orchestra® range. They will ensure that patios, balconies and courtyards are kept looking resplendent throughout the whole of autumn and also give you a means of appealing to new customer groups.

IT Questo assortimento Uniflora di Selecta è unico sul mercato. Le forme e le dimensioni dei fiori compongono una gamma insolita e attraente che si integra perfettamente con l'assortimento Orchestra®. Questi prodotti garantiscono una splendida decorazione di terrazze, balconi e patii per tutto l'autunno e permettono anche di apprezzare nuovi gruppi di clienti.

ES Este surtido Uniflora de Selecta es único en el mercado. Las formas y los tamaños de las flores permiten una oferta extraordinaria y atractiva que a la vez viene siendo el perfecto complemento al surtido Orchestra®. Durante todo el tiempo de otoño garantizan una decoración bellísima para terrazas, balcones y patios y, además, le dan a Vd. la oportunidad de dirigirse a nuevas clientelas.

Orchestra®

Orchestra

F La gamme Unifleurs Orchestra Selecta est unique par l'intensité de ses coloris la robustesse et la grosseur de ses fleurs. Les lignées Kena, Pipa, Emeric et Luth® vous permettront une culture homogène pour obtenir un produit final de grande qualité. Vous pourrez également cultiver ces variétés en mélanges. Cette gamme peut également se cultiver en mode traditionnelle en pinçant les boutures.

IT L'assortimento Uniflora Orchestra di Selecta è unico per l'intensità dei suoi colori, la robustezza e le dimensioni dei fiori. Le linee di prodotti Kena, Pipa, Emeric e Luth® consentono una coltivazione omogenea per ottenere un prodotto finale di alta qualità. È possibile coltivarle anche in combinazione con altre varietà. Questo assortimento può essere coltivato anche tradizionalmente, partendo da talea.

GB The single-flower Orchestra range from Selecta is unique thanks to its intense colours, its robustness and the size of its flowers. The Kena, Pipa, Emeric and Luth® product lines allow you to cultivate your arrangements together to create a first-class end product. You can also cultivate these varieties in combination with each other. In addition, this range can be cultivated the traditional way, using cuttings.

ES Por la intensidad de sus colores, la robustez y el tamaño de sus flores, el surtido Uniflora Orchestra de Selecta es sin par. Las líneas de productos Kena, Pipa, Emeric y Luth® permiten una cultivación homogénea para obtener un producto final de alta calidad. También es posible cultivar mezclas de estas variedades. Este surtido puede ser cultivado también de forma tradicional mediante esquejes.

Asters

F La série Astral® à floraison d'automne est déjà commercialisée au sein de notre gamme depuis plusieurs années en France. Pour une période de floraison précoce au début de septembre, nous vous proposons quatre couleurs différentes, dont la nouvelle Astral® Leukothea aux fleurs blanches. Trois autres variétés sont disponibles pour une floraison tardive, fin septembre. Toutes les variétés se distinguent par leur ramification naturelle très dense, qui ne nécessite aucun régulateur de croissance. Toutes les variétés sont résistantes aux Erysiphaceae (oidium).

IT La serie Astral® è stata sviluppata appositamente per la coltivazione all'aperto con fioritura in autunno ed è disponibile in commercio già da molti anni nel nostro assortimento per la Francia. Per un periodo di fioritura precoce all'inizio di settembre offriamo quattro diversi colori - tra cui la new entry Astral® Leukothea a fioritura bianca. Altre tre varietà sono disponibili per il successivo periodo di fioritura a fine settembre. Tutte le varietà sono caratterizzate da una ramificazione molto densa e naturale, per la quale non sono necessari regolatori di crescita. Tutte le varietà sono resistenti all'oidio.

GB The Astral® series has been developed specifically for outdoor cultivation with flowers in autumn and has been part of our commercial range in France for many years. We offer numerous colours for early flowering at the start of September, including the white flowers of Astral® Leukothea, a new addition. Three further varieties are available for the later flowering period at the end of September. All varieties are recognisable by their very dense, natural branching, with no growth regulators required. All of them are also highly resistant to powdery mildew.

ES La serie Astral® ha sido desarrollada especialmente para el cultivo al aire libre con floración en otoño y ya desde hace muchos años forma parte de nuestro surtido comercial para Francia. Para un período de floración temprano, a principios de septiembre, ofrecemos cuatro colores diferentes - incluyendo la novedad recientemente presentada Astral® Leukothea de floración blanca. Para el período de floración posterior a finales de septiembre están disponibles tres variedades más. Todas las variedades se caracterizan por una ramificación muy densa y natural que no necesita regulación de crecimiento. Todas las variedades son resistentes al mildiú.

IT'S ALL IN THE MIX!

Everything is possible:

F La fin de l'été et l'automne sont des périodes de vente de plus en plus importantes et l'attrait des produits pratiques auprès des consommateurs reste une tendance à la hausse ! Les recommandations de combinaisons proposées par Selecta et impliquant les secteurs des œillets vivaces et en pots, des graminées, herbacées et lavandes offrent des possibilités quasi illimitées qui répondent parfaitement à cet engouement ! Avec une floraison durable et tardive, ces variétés testées garantissent une apparence séduisante et colorée jusqu'au cœur du mois de novembre.

Les différentes variétés peuvent être cultivées pour la production de pots unitaires pour couches entières ou plateaux mélangés, nombreux Twinnis et petites vasques ou impressionnants bacs et CC à thème, ou encore en composition individuelle ou directement en tant que jeune plant. Les temps de culture sont courts et la production ne requiert aucune condition particulière ni intervention supplémentaire. De nombreuses variétés sont disponibles en format RC ou MiniRooter®.

Grâce à leur grande variabilité, la totalité de l'éventail d'offres peut être couvert, du prix d'entrée de gamme aux produits premium. La longue durée de vie, pendant la commercialisation, puis chez le client final, constitue un atout supplémentaire. Le concept préserve enfin une marge de manœuvre suffisante pour le développement de vos propres idées créatives pour diverses tailles de conteneurs et compositions attrayantes.

IT La tarda estate e l'autunno stanno diventando sempre più importanti come periodi di vendita, e la tendenza verso la convenienza sta diventando sempre più forte per i consumatori. Le possibilità di soddisfare questa tendenza sono quasi illimitate grazie alle raccomandazioni di Selecta per le combinazioni di piante, tra cui garofani perenni e in vaso, graminacee ornamentali, erbe aromatiche e lavanda. Le varietà testate garantiscono un aspetto attraente e colorato con fioriture lunghe e tardive fino a novembre.

Le varietà possono essere coltivate in vasi singoli e proposte su pianali interi o in vassoi misti, da ciotole più piccole fino a contenitori più grandi e carrelli a tema. Possono essere coltivate singolarmente o coltivate partendo direttamente dalle giovani piantine. I tempi di coltivazione sono brevi e non sono necessarie particolari condizioni di coltivazione o ulteriori spese. Molte varietà sono disponibili come RC e MiniRooter®.

Le infinite possibilità di questo concetto coprono l'intero spettro di prezzo, dall'entry level al premium. La lunga durata per la vendita nei negozi e per i consumatori è un ulteriore vantaggio di questo concetto. C'è anche sufficiente libertà per sviluppare le proprie idee creative per diverse dimensioni di vasi e combinazioni di colori.

GB Late summer and autumn are becoming more and more important as sales periods, and the trend towards convenience is becoming ever stronger for consumers. There are almost unlimited possibilities for catering to this trend thanks to Selecta's recommendations for plant combinations, including perennial and pot carnations, grasses, herbs and lavender. The tested varieties guarantee an attractive and colourful appearance with long-lasting and late blossoms well into November.

The individual varieties can be grown from single pots for whole layers or mixed trays, from a large number of twinnies and smaller bowls, all the way up to impressive containers and themed CCs. They can be grown individually or cultivated directly from seedlings. The cultivation times are short, and there is no need for special growing conditions or further expenditure. Many varieties are available as RC and MiniRooter®.

The great variety of this concept covers the entire price spectrum, from entry level to premium. The long durability for selling in shops and for consumers is a further advantage of this concept. There is also sufficient freedom to develop your own creative ideas for different container sizes and attractive colour combinations.

ES El final del verano y el otoño adquieren cada vez más importancia como períodos de venta y el tema del Conveniencia es una tendencia cada vez más fuerte entre los consumidores. Con las recomendaciones de Selecta para combinaciones de plantas de los ámbitos de perennes y claveles de maceta, gramíneas, hierbas y lavanda se presentan unas posibilidades prácticamente ilimitadas para satisfacer esta tendencia. Las variedades probadas con floración duradera y tardía garantizan una apariencia atractiva y de rico colorido hasta bien entrado el noviembre.

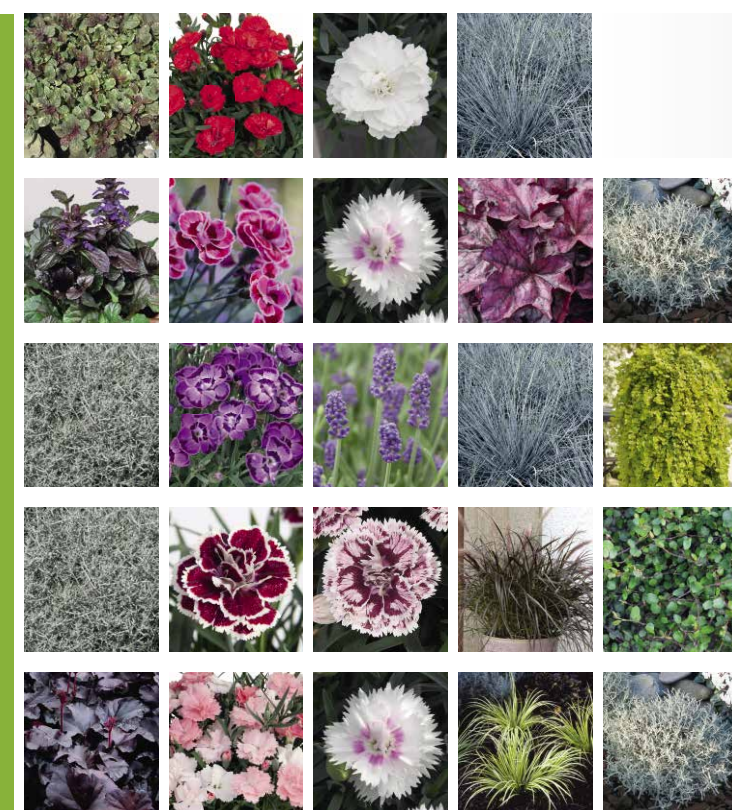

Las diferentes variedades pueden ser combinadas individualmente desde la producción de macetas individuales para paletas completas o bandejas mezcladas, pasando por grandes cantidades de twinnies o cuencos más pequeños hasta impresionantes contenedores y carros temáticos, y también pueden ser cultivadas directamente como plántulas jóvenes. Los períodos de cultivo son cortos y no se necesitan condiciones de producción especiales ni más requisitos. Muchas variedades están disponibles como esquejes enraizados y como MiniRooter®.

Gracias a la gran variabilidad puede cubrirse completamente todo el espectro de precios, desde el precio de entrada hasta el nivel prémium. La alta durabilidad tanto en el comercio minorista como en el hogar de los consumidores constituye otra ventaja de este concepto. Aparte de esto, dejan un amplio margen para desarrollar libremente sus propias ideas creativas de diferentes tamaños de recipientes y atractivas combinaciones de colores.

NATURE GARDEN

www.selecta-one.com

NATURE GARDEN

GB The diversity of insect species, particularly bees and butterflies, is decreasing. It is up to us to protect their habitats, create areas full of flowers and maintain a natural garden. This is exactly what our Nature Garden concept is designed for. Our breeding programmes are aimed at increasing biodiversity, and we have upgraded our assortment with plenty of insect-friendly varieties.

Selecta one was part of the EIP project (European Innovation Partnerships) for the "development and implementation of a biodiversity breeding program to increase the appeal of urban green for insects".

Goal of the project:

The project aims to provide data-driven information to strengthen the Selecta plant assortment and guidelines for a biodiversity breeding program to increase the appeal of urban green for insects. The trials were executed in collaboration with LVG Heidelberg, the Staudenrausch nursery and the office of bee science in Stuttgart, Hohenheim.

The varieties in the Selecta one range, which cut off in several tests as "particularly insect-friendly" are marked in our catalog with the "approved"-symbol. The aim of the "Nature Garden" concept was to strengthen the Selecta one range with insect-friendly varieties and to develop a biodiversity breeding program.

Tested Perennials in Selecta assortment

| Variety | Insects attracted | Insect friendliness | Maximum number of insects (in 2 min. of period under review) |
|---------------------------------------|---|---------------------|--|
| Echinacea purpurea ,Meditation White® | Especially honeybees, but also bumblebees | Very good | 26 |
| Echinacea purpurea ,Sensation Pink® | Especially honeybees, but also bumblebees | Very good | 22 |
| Gaura Belleza® 048 | honeybees, small wild bees, hoverflies | Very good | 15 |
| Lavandula ,Les Bleus Thierry' | honeybees, bumblebees, bigger hoverflies | Very good | 13 |
| Lavandula ,Les Bleus Antoine' | honeybees, bumblebees, bigger hoverflies | Very good | 26 |

Aromatics

F Nous présentons dans ce chapitre notre sélection de fines herbes aromatiques. Notre partenaire Silze Jungpflanzen produit les plants d'herbes aromatiques sur des surfaces certifiées pour la culture de légumes. Ces surfaces conviennent à la culture de plantes aromatiques comestibles.

IT In questa sezione racchiudiamo il nostro assortimento di lavanda e la nostra raffinata selezione di aromatiche. Il nostro partner Silze Jungpflanzen produce le giovani piantine in aree certificate per la coltivazione di ortaggi, adatte dunque per la coltivazione di aromatiche commestibili.

GB In this section, we will summarise our lavender assortment and our fine herb selection. Our partner Silze Jungpflanzen produces the herb seedlings in areas certified for the cultivation of vegetables. They are suitable for growing edible herbs.

ES En este capítulo reunimos nuestro surtido de lavanda y la selección de hierbas exquisitas. Nuestro socio Silze Jungpflanzen produce las plántulas de las hierbas en áreas certificadas para el cultivo de hortalizas. Son adecuadas para la producción de hierbas comestibles.

KLELV16122

selecta^{one} Info - Lavandula angustifolia

- F** La sélection « LesBleus » de Selecta sont des Lavandula angustifolia résistantes à l'hiver, fleurissant en moyenne deux semaines plus tôt que la variété Hidcote Blue. Leurs panicules courtes et denses colorent intensément la plante et permettent de charger un étage supplémentaire par conteneur. Idéal pour réduire les frais de transport.
- GB** The Selecta varieties of 'LesBleus' are hardy Lavandula angustifolia and on average two weeks earlier flowering than the variety Hidcote Blue. The short and densely covered flower panicles provide a richly coloured plant and allow packing one layer more per container than usual. Ideal to reduce transport costs.
- IT** La varietà 'LesBleus' ibridata da Selecta è una robusta varietà di Lavandula Angustifolia che fiorisce in media due settimane prima della varietà Hidcote Blue. La pannocchia fiorale corta e piena fornisce una pianta riccamente colorata e consente di imballare sul carrello un pianale in più del solito. Ideale per ridurre i costi di trasporto.
- ES** La novedad „LesBleus“ de Selecta es una Lavandula angustifolia resistente al invierno que comienza a florecer, por término medio, dos semanas antes que la variedad Hidcote Blue. Las cortas y densas espigas de flores dan un mundo de color a la planta y a la vez permiten empacar una capa más de lo usual por contenedor. Ideal para reducir costes de transporte.

Grasses

F Les graminées sont indispensables dans tout assortiment ! Imperata, Pennisetum, Carex ou Festuca s'utilisent comme plantes isolées, plantes de parterre ou comme protection contre les regards indiscrets dans le jardin et conviennent à la perfection pour les plantations mixtes ainsi que comme composantes essentielles des « Autumn Friends ». Beaucoup d'entre elles résistent à l'hiver.

IT Le graminacee ornamentali completano ogni assortimento! Imperata, Pennisetum, Carex o Festuca possono essere usate come piante singole, in aiuole o come complemento nei giardini. Sono particolarmente adatte per combinazioni dalla primavera all'autunno. Sono facili da curare e spesso molto resistenti.

GB Grasses complete any assortment! Imperata, Pennisetum, Carex or Festuca can be used as solitary plants, in beds or as a sight protection in gardens. They are well suited for combination plantings, particularly as an essential component of Autumn Friends. They are also hardy in many cases.

ES ¡Las gramíneas completan cualquier gama de productos! Imperata, Pennisetum, Carex o Festuca pueden ser utilizadas como plantas individuales, en camas o como setos que sirven de protección visual en el jardín. Son muy adecuadas para plantaciones combinadas y, particularmente, son un componente esencial de los Autumn Friends. Muchas gramíneas son resistentes al invierno.

Mandevilla

F Les Dipladenia évoquent l'été méditerranéen et apporte une touche vacancière aux intérieurs. Avec leur floraison abondante, ils parent les balcons, terrasses et massifs floraux ensoleillés de couleurs intenses et lumineuses. Magnetica Dark Red produit des fleurs rouge foncé qui semblent couvertes de velours. Elle présente la particularité de ne pas ternir au soleil. La variété Sevilla Rosè produit des fleurs roses très attrayantes et convient également aux petits pots. La célèbre série Sundaville® séduit par sa polyvalence et sa vaste palette de couleurs.

IT Abbondante fioritura con colori forti e accesi, la Dipladenia è di diritto la regina della primavera/estate. Può essere posizionata in pieno sole su balconi, patii o aiuole per dare colore e un'aria di estate. Magnetica Dark Red ha un fiore rosso scuro con effetto "velluto" con la straordinaria peculiarità di non scolorire al sole. Sevilla Rosè ha un tono di rosa molto accattivante ed è adatta anche a vasi di piccole dimensioni. La conosciutissima serie Sundaville® è apprezzata per la sua versatilità e per l'ampia disponibilità di colori.

GB Abundant flowering with strong and bright colours, Dipladenia is the queen of spring/summer. It can be placed in full sun on balconies, patios or flowerbeds to give colours and a feeling of summer. Magnetica Dark Red has a dark red flower with a "velvet" effect with the extraordinary peculiarity of not fading under the sun. Sevilla Rosè has a very attractive pink flowers and is also suitable for small pots. The well known Sundaville® series is appreciated for its versatility and the wide range of colours.

ES Las dipladenias crean un ambiente de verano mediterráneo y traen la sensación de vacaciones a la casa. Con su floración abundante envuelven los soleados balcones, terrazas y bancales en unos colores intensos y llamativos. Magnetica Dark Red tiene una flor de color rojo oscuro con un efecto de "terciopelo". Y lo extraordinario es que este efecto se mantiene aun estando expuesta al sol. Sevilla Rosè tiene una flor de color rosado muy atractiva y es apropiada también para macetas más pequeñas. La conocida serie Sundaville® encanta por su gran diversidad y el amplio abanico de colores.
