

Lisianthus
SAKATA'S FINEST

RELEASE DATE SEPTEMBER 2024

SAKATA'S FINEST LISIANTHUS

Lisianthus offers endless possibilities, whether showcased as single blooms or in mixed bouquets. Sakata's extensive range covers a broad spectrum of Lisianthus varieties, including the market-leading 'Alissa' and 'Rosita' series. Sakata's Lisianthus assortment is designed to thrive under diverse climatic conditions and growing techniques. Before introducing a new variety, it undergoes rigorous testing in multiple countries and a shelf-life assessment. Only the best pass the tests to ensure top-quality. Sakata's Product Management team leverages their expertise to select the best varieties, featuring innovative characteristics and vibrant new colours.

This brochure offers an attribute guide to help you pick the best variety for factors like seasonality, geographical region, climate, flower size, shape, and other cultural aspects. This way you will always select the right genetics for your growing environment.

While Sakata is the market leader in Lisianthus, our expertise extends beyond that. Sakata also specializes in breeding a wide range of bedding plants, potted plants, and cut flowers. Backed by over a century of experience, we develop quality genetics for commercial growers and gardeners.

For advice, please contact one of Sakata's Product Specialists or Sales Representatives.
