2024 NEW VARIETIES

Rosanne 1 Green Ver.2
(SM2-990)

Rosita 4 Blue Ver.2
(SM8-A-181M)

Voyage 2 Deep Pink
(SM9-A-730M)

Reina White Ver.4
(SM8-846)

Aube Champagne
(SM8-241)

ROSITA BLUE VER.2 (SM8-338)

Group 1

- Middle size, rose shaped double flowers
- Less abortion problems, easy to get plant height and volume in low temperature conditions

ROSITA 4 BLUE VER.2 (SM8-A-181M)

Group 3.5

- Middle size, rose shaped double flowers
- Very attractive deep purple flower with coloring on buds
- Easy to get plant height and volume with hard flower stems even for hot summer harvest
- Intermediate Fusarium resistance

VOYAGE 2 DEEP PINK (SM9-A-730M)

Group 2

- Large size, well fringed double flowers
- Highly demanded deep pink flower color
- Easy to take plant height, less tip burning, large flower size with enough petal count

AUBE BRIGHT PINK (SM8-A-109M)

Group 3

- Large double flower shape with round petals with green center
- More plant volume with harder flower stems than Robella 3 Clear Pink
- Intermediate Fusarium resistance

AUBE CHAMPAGNE (SM8-241)

Group 3

- Large double flower shape
- Additional color to Aube series with very attractive Champagne color
- Intermediate Fusarium resistance

AUBE 4 PINK FLASH (SM9-A-119)

Group 4

- Large double flower shape with round petals
- More branchings and plant height than Reina 3 Pink Flash in hot summer harvest
- Intermediate Fusarium resistance

REINA WHITE VER.4 (SM8-846)

Group 1.5

- Extra large size, semi fringed double flower shape
- Less botrytis problem on petals and harder flower stems
- Enough stem length under low temperature, recommended for winter to spring harvest

REINA LAVENDER VER.2 (SM8-852)

Group 1

- Large size, semi-fringed double flowers
- Attractive bluish lavender flower color
- Easy to get plant height and easy to bloom in low temperature with less abortion issues

ROSANNE 1 GREEN VER.2 (SM2-990)

Group 1.5

- Large size, double flowers with glossy petals
- Less off type flowers, deeper green color and more branching than Rosanne 1 Green
- Suitable for winter to spring season harvest

Rosette Free Lisianthus

Competitor's variety

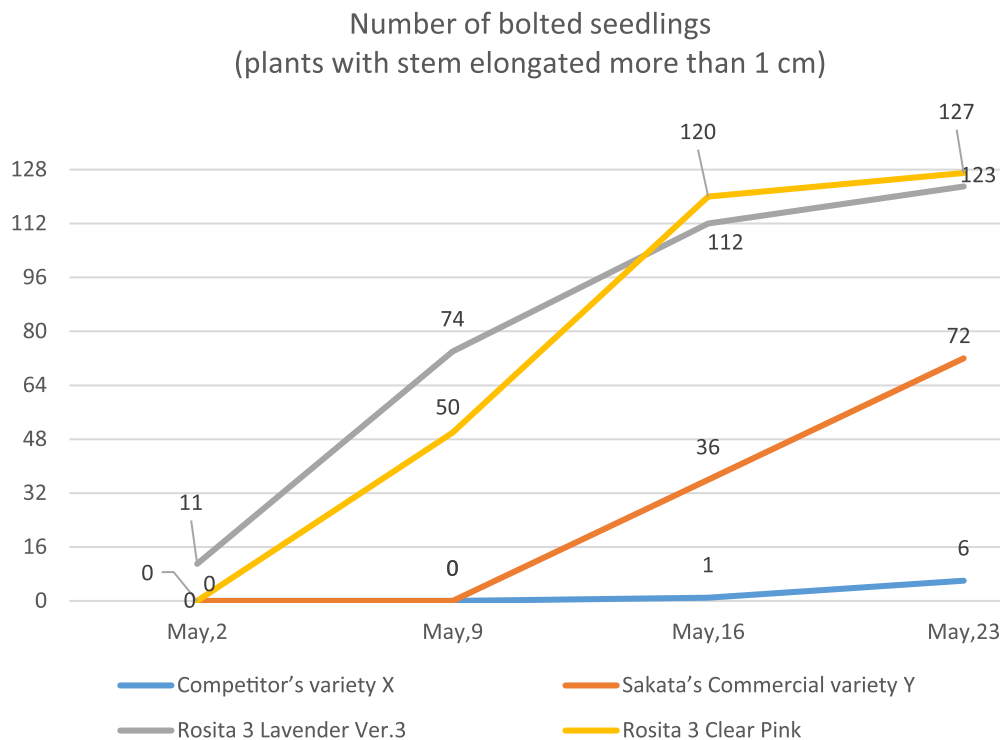

Rosette Free Lisianthus

■ Test for the occurrence of rosette

Conditions : 32° C - 23° C (Day temp. - Night temp.), 12 hours day length test

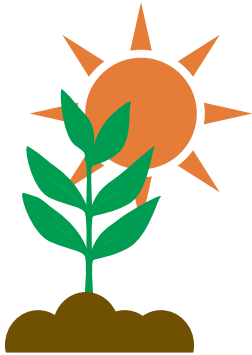

Tested 128 plants / variety

Results: Rosette Free Lisianthus seedlings exhibited a high rate of bolting even under high temperature conditions, without pre-cooling treatment.

. ※ Reported by the Center for Environment, Health and Field Sciences of Chiba University.

The 3 benefits of Rosette Free Lisianthus

1. Expanded use

- Possible to raise seedlings and transplant even under hot temperature conditions
- Expanded seedling production areas
- Potential to develop new cut flower production areas

2. Increased profitability

- Rosette Free Lisianthus makes more number of salable cut flowers
- Can harvest more stems per plant after pinching and for second flush

3. Reduced production cost

- Do not require such pre-cooling and cooling treatments, which contributes to reducing costs
- Earlier growing speed of second flush

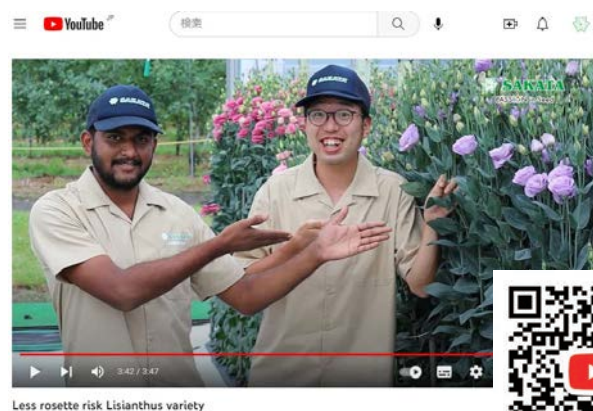

2 varieties are introduced as 2023 New

Rosita 3 Clear Pink
(SM0-400)

Rosita 3 Lavender Ver.3
(SM0-190)

***Rosette may occur under extremely stressed conditions**

Sakata Seed Corporation has obtained the exclusive right of use for the patented technologies below.

Right holder (applicant): YISSUM RESEARCH DEVELOPMENT COMPANY OF THE HEBREW UNIVERSITY OF JERUSALEM LTD. (Israel)

ROSITA SERIES

The rose without thorns! Rosita is the standard in double flowered Lisianthus. With hard flower petals and strong stems, it is easy to transport the flowers without Botrytis problems. Masses of rose like flowers and long vase life please consumers. Rosita is available in group 1,2,3 and 4 for maximum flexibility of programming.

Rosita 2 Pure White

ROSITA

- Group 1,2,3 and 4
- Middle size, rose shaped double flowers
- Excellent vase life with more usable buds
- Hard flower petals and top flowering reduce Botrytis during transportation
