2 Light Pink SU

Intro

3 Deep Pink SU

* *Sugoi!* = Wow, amazing! extra fringed petals

Legend has solid stems and strong flower petals for good cut flower transportation and vase life.

Dense flower spikes and intense colours make an impressive accent in flower arrangements.

Light Pink is slightly shorter (95 cm) than other colours (100-130 cm).

Light Pink
FKG604

Pink

Crane F1 Series

Brassica oleracea

Tough guy; cold resistant | Conservable and perfect vase life

Germination temperature
20-25°C

Days to germinate
4-5 days

Stem length
60-90 cm

Feather King
FHB703

Feather Queen
FHB702

Feather leaf type

Cut flower Brassica with feathery leaves.

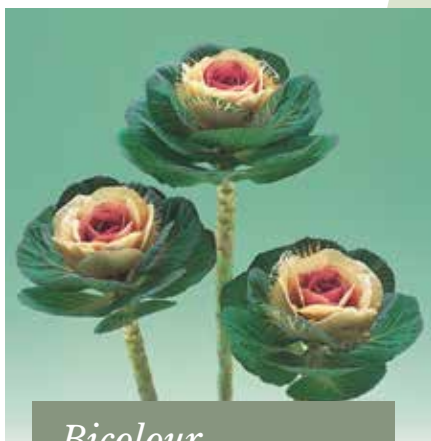

Feather Queen and Feather King have a very uniform, upright habit and complement each other very well.

Round leaf type

Winter bouquets are much more charming with the Crane series's round shape, varied colours, and long-lasting vase life.

Genetically, the flower head was bred to be compact; however, plant spacing will also determine the flower's head size.

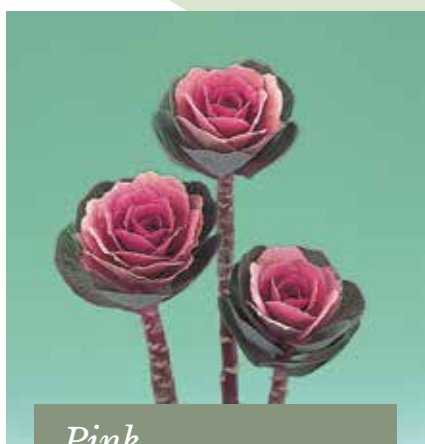

Crane Pink, Red and White have a very uniform, upright habit and complement each other very well.

FHB692

Flare F1 Series

Brassica oleracea

Flowering kale

Germination temperature
20-25°C

Days to germinate
4-6 days

Stem height
60-110 cm

Very early maturity and easy to get tall stem.

Flare Rose and Flare White have very uniform, wavy leaves, upright habit.

Flare White has such a pure white colour that is also well suited for dyeing.

A highly branched, cut flower. Is a fast growing, erect, winter/spring-growing annual herb, that resembles a thistle.

Kinko & Zanzibar

Carthamus tinctorius

High quality cut flower item

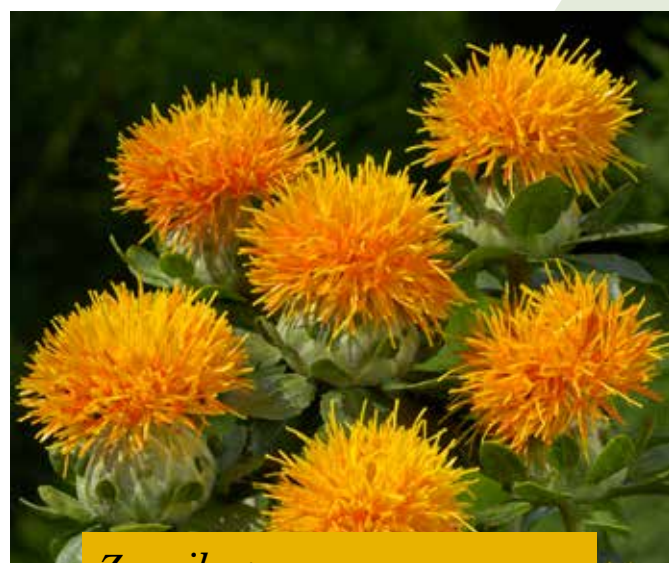

Germination temperature
15-20°C - Dark required

Days to germinate
4-6 days

Stem height
60-75 cm

Kinko
FSZB92

Zanzibar
FSZB95

Blue
FDL402

Pink
FDL401

Jenny's Pearl

Delphinium grandiflorum

The pink colour is an excellent addition in wedding bouquets

Germination temperature
15-20°C

Days to germinate
15-20 days

Stem height
50-70 cm

Stable flower colour during high-temperature condition.

For pot use and cut flower production.

Blue
FDL205

Aurora F1 Series

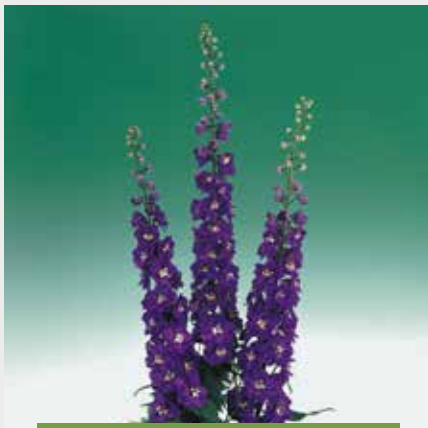

Delphinium elatum

Excellent as garden plants or large container plants

Germination temperature
15-20°C - Dark required

Days to germinate
10-12 days

Stem length
90-120 cm

Deep Purple
FDL208

Takii's F1 hybrid Aurora Delphinium's popularity continues to increase due to its outstanding performance as a cut flower and a garden perennial. Aurora excels in uniformity and quality.

The stems are very sturdy with relatively small leaves, making them ideal for cut flower use.

Lavender
FDL207

Light Blue
FDL211

Light Purple
FDL212

White
FDL213

Variety comparison among the Aurora F1 Series

Variety	Flower Size		Plant Height	
	cm	inch		
Blue	5.5	2.2	C	<div style="display: flex; align-items: center; justify-content: center;"> <div style="writing-mode: vertical-rl; transform: rotate(180deg); font-size: 2em; margin-right: 5px;">↑</div> <div style="writing-mode: vertical-rl; transform: rotate(180deg); font-size: 2em; margin-right: 5px;">↓</div> <div style="text-align: center;"> <p>Taller A</p> <p>B</p> <p>Shorter C</p> </div> </div>
Deep Purple	5.5	2.2	A	
Lavender	6.0	2.5	C	
Light Blue	5.5	2.2	B	
Light Purple	5.5	2.2	C	
White	6.0	2.5	C	

The above data is based on trials completed in Japan. Actual results depend on environmental conditions and local practices that may affect the variety's characteristics and performance

Seed Storage

Store seeds under dry and low temperature (approx. 5°C/40°F) condition. Storing seeds at room temperature (above 18°C/46°F) may result in very low germination.

Tips for cultivation

- Warm temperatures and long day conditions induce flowering.
- Plug finish time is 5-6 weeks. During this time, optimal growing temperatures are 15-25°C/60-78°F.
- 2-3 Weeks after transplanting, the flowering stems will start to elongate.
- Short day conditions will induce rosetting.
- When plants have fewer than 5 true leaves, temperatures below approximately 15°C/60°F will also cause rosetting.
- Under short-day conditions, 4 hours of night interruption will help initiate and develop flowering

Purple Sheen

Eryngium leavenworthii

Germination temperature
20-25°C

Days to germinate
12-20 days

Stem length
80-120 cm

Purple sheen carries vibrant purple flowers on sturdy stems.

Excellent as a vase filler.

From sowing to flower six to seven months.

Prefers sunny and dry conditions.

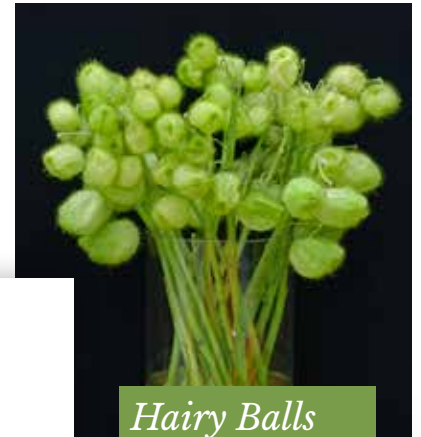

FSZA44

The hairy fruit is light green, round with soft spines and are selected for cut flower decorations and conservatory plants.

12 hours day length is required for flower.

An unique item for mixed bouquets.

Hairy Balls
FSZE22

Hairy Balls

Gomphocarpus physocarpus

Germination temperature
22-25°C

Days to germinate
7-10 days

Stem length
120 cm

45-55 day type

Helianthus Premier F1 series is extra-early, offering a very short crop time of approximately 45-55 days from sowing and excellent uniformity.

Sowing is recommended under long-day conditions for early summer harvest to secure enough stem length.

Stable colour of petals.

SUNRICH

More info

*Summer Orange
DMR FHM462*

*Orange DMR
FHM457*

Sunrich[®] DMR F1 Series

Helianthus annuus

World's first downy mildew highly-resistant variety for ornamental Helianthus

Germination temperature
18-20°C

Days to germinate
4-6 days

Stem length
130-190 cm

- The introduction of Sunrich Orange DMR F1 drastically changed Helianthus production.
- Growers have less to worry about downy mildew problems. This DMR breakthrough's added value provides substantial benefits with high yield results and the reduction of chemical use.
- Resistant to multiple strains of downy mildew (*plasmopara halstedii*)
- Plant height, growing speed, and flower shape and colour are similar to Sunrich Orange F1

Disclaimer

1. Sunrich Orange DMR F1 highly restricts the growth and development of the above-stated pathogen and the damage they cause under normal pathogen pressure compared to susceptible varieties. It may, however, exhibit some disease symptoms or damage under heavy pathogen pressure.
2. New and/or atypical strains of the specified pathogen may overcome the resistance, sometimes completely.

Gold
FHM515

The Sunrich series has superb quality and maintains its leading position in the Helianthus market.

Flowers of the Sunrich series are pollenless, long-lasting, densely petalled and have strong stems.

Depending on growing conditions, the series flowers in 55-70 days after sowing.

Sunrich[®] F1 Series

Helianthus annuus

Sunrich Orange | Sunrich Gold | Sunrich Lemon

Germination temperature
18-20°C

Days to germinate
4-6 days

SUNRICH

Sunrich[®] Summer F1 Series

Helianthus annuus

Lemon | Limoncello | Orange | Provence

Germination temperature
18-20°C

Days to germinate
4-6 days

Stem length
120-180 cm

Limoncello Summer presents a stable bicolour of vibrant yellow transitioning to a light, creamy yellow at the tips.

This uniqueness brings a great accent to the Helianthus market. Sunrich Orange Summer F1 flowers 5 to 10 days earlier than Sunrich Orange F1, but the flower shape and colour are identical to Sunrich Orange F1.

Suitable for spring to summer cultivation with sowing and growing under long-day conditions.

Full Sun Imp F1 & Tiffany F1

Helianthus annuus

The two professional varieties with the largest flowers

Germination temperature
18-20°C

Days to germinate
4-6 days

Stem length
130-190 cm

Takii's Helianthus characteristics of the cut varieties

Variety	Petal	Disc	Days to flower	Remark
Sunrich Orange DMR F1	Orange	Black	55-70 days	Downy mildew highly-resistant
Sunrich Orange F1	Orange	Black		The quality standard in the market
Sunrich Lemon F1	Yellow	Black		
Sunrich Gold F1	Orange	Green		
Sunrich Orange Summer F1	Orange	Black	50-65 days	5-10 days earlier than Sunrich Orange
Sunrich Summer Orange DMR F1(NEW)	Orange	Black	50-65 days	Downy Mildew highly-resistance.
Sunrich Provence Summer F1	Deep Orange	Black	50-65 days	5-10 days earlier than Sunrich Orange
Sunrich Limoncello Summer F1	Lemon with yellow base	Black		
Premier Alpha F1	Orange	Black		
Premier Orange F1	Orange	Black		
Premier Lemon F1	Yellow	Black	45-55 days	Extra-early varieties
Premier Gold Up F1	Dark Yellow	Black		
Premier Orange Up F1	Orange	Black		
Tiffany F1	Orange	Black	60-80 days	Round orange flowers with dark disks
Full Sun Improved F1	Dark Yellow	Black	55-100 days	Sufficient stem length even under short day conditions
Marley (NEW) F1	Yellow/Brown bicolour	Black	45-70	Early flowering under short-day condition.
Ziggy (NEW) F1	Cream/Purple bicolour	Black	45-70	Compare to Marley, 3-5 days late flowering.

The above data is based on trials completed in Japan. Actual results depend on environmental conditions and local practices that may affect the variety's characteristics and performance.

55-100 day type

Full Sun Improved
FHMA13

60-120 day type

Tiffany
FHMA14

The golden-yellow flowers have pretty purple-brown discs and beautiful, short petals.

Even under short-day conditions in the temperate climate area, Full Sun Improved can have sufficient stem length.

It is preferable to have 18°C at the lowest temperature cultivation.

A unique colour combination of cream and purple.

Marley F1 & Ziggy F1

Helianthus annuus

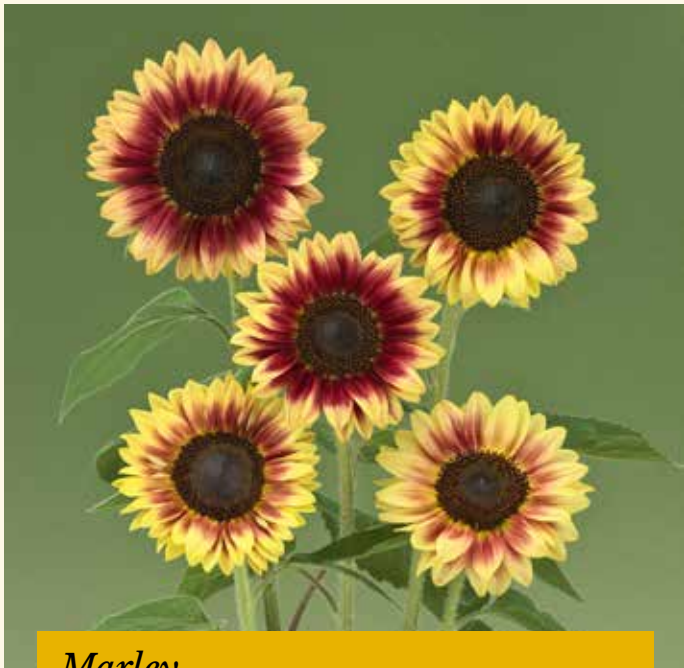

Bicolour Sunflower

Germination temperature 18-20°C

Days to germinate 4-6 days

Stem length 130-180 cm

Watch video

Marley
FHM461

Compared to Marley:

- colour combination of yellow and brown
- less side-shooting
- 3-5 days later flowering

Colour variation makes each flower head unique.

Under warmer conditions and strong light, colour might be deeper.

Ziggy
FHM464

FRS702 3 Pink

Arena F1 Series

Lisianthus grandiflorum

A wonderful palet of colours in Arena serie

*Light required -Germination
temperature 20-22°C*

*Days to germinate
20-25 days*

*Stem length
70-90 cm*

Introducing new colours every year, the Arena series now totals 24 varieties, giving more choices for growers, florists and consumers.

Selected for its high quality and fully double flowers on strong and sturdy stems.

Thick petals help transportability and large buds on the top increase the attractive character of the stems.

Arena III Pink may have less doubleness under high temperature conditions during flower bud formation stage.

Variety Comparison among Arena

Variety Name	Flower Size		Branching	Plant Height	Stem Strength	Characteristics
	cm	inch				
Arena F1 1 Light Pink Imp.	8.0	3.2	Good	Short	Hard	More number of petals and early flowering than Arena I Light Pink
Arena F1 1 Purple	8.5	3.4	Good	Medium	Hard	Easy to get long stem and good branching
Arena F1 1 Pure White	8	3.2	Good	Short	Hard	High stable doubleness. Very easy to grow.
Arena F1 1 White	7.5	3	Good	Tall	Normal	Good flower shape and easy to get long stem.
Arena F1 2 Kilimanjaro	8.0	3.2	Excellent	Medium	Very Hard	Abundant flower under strong sunlight
Arena F1 2 Light Pink	7.5	3.0	Good	Medium	Hard	Medium-size flowers with the colour like cherry blossoms
Arena F1 2 Purple Picotee	8.0	3.2	Good	Short	Normal	Picotee edge is vivid and stable
Arena F1 2 White	8.0	3.2	Good	Medium	Very Hard	Excellent flower shape, Strong stem
Arena F1 3 Apricot	8.0	3.2	Good	Tall	Hard	Unique colour of flower
Arena F1 3 Baby Pink	8.0	3.2	Good	Medium	Hard	Wavy, thick petals with good transportability
Arena F1 3 Blue Picotee	7.5	3.0	Good	Tall	Very Hard	Thick petal and top flowering type
Arena F1 3 Champagne	8.0	3.2	Good	Medium	Hard	Large flowers with many petals
Arena F1 3 Clear Pink	8.0	3.2	Good	Tall	Hard	Flower buds shape is like peony.
Arena F1 3 Gold	8.0	3.2	Good	Tall	Hard	High performance with its yellow gold flower
Arena F1 3 Green	7.5	3.0	Excellent	Medium	Hard	Nice thick flower petal, good sturdy stem
Arena F1 3 Mont Blanc	8.0	3.4	Good	Tall	Normal	Nice flowershape. Sufficient height in the warm conditions
Arena F1 3 Pink	8.0	3.2	Good	Tall	Hard	Bright pink under fluorescent light
Arena F1 3 Pink Flash	8.0	3.2	Good	Tall	Very Hard	Sturdy stem with high quality flower
Arena F1 3 Purple	7.0	2.8	Good	Medium	Hard	Curly, thick petals with deep purple colour
Arena F1 3 Red	6.0	2.4	Good	Tall	Hard	Vivid red, Unusual colour for Eustoma
Arena F1 3 Rose	8.0	3.4	Good	Tall	Hard	Abundant flower with high doubleness under strong sunlight
Arena F1 3 White (NEW)	10.0	4.0	Good	Tall	Hard	One of the biggest flower size variety within Arena series
Arena F1 4 Rose	7.0	2.8	Good	Very Tall	Very Hard	Suitable for season when it gets difficult to secure enough stem length
Arena F1 4 White	8.0	3.2	Good	Very Tall	Very Hard	Long stems suitable for cultivation under high temperatures and strong light intensity

The above data is based on trials completed in Japan. Actual results depend on environmental conditions and local practices that may affect the variety's characteristics and performance.

Fully double large flower.
Thick and strong stems more suitable for production under high temperature and long day conditions.
